

Place2.....

meet, move, conference, promote...

Multitask media furniture for stationary or mobile use with 2 functions: presentation and meeting station in the open-space office

Place2meet

Place2meet gives the staff an opportunity for spontaneous dialogues and provides for a pleasant break through the „time out module“ on the rear side.

Key features

- To encourage communication and cooperation.
- To enhance the working environment.
- To improve the productivity and creativity of a team.
- To allow all participants to easily share the digital transfer of knowledge.
- To create a meeting point of its own.
- To allow the participants to sit or stand due to the integrated height adjustment.
- To save space in the office.

Place2meet - The communication island in the open-space office
Spontaneous communication of colleagues and their creativity are the basis of success and part of the working culture of a company.

As the centre point in an open-space office Place2meet encourages communication and cooperation and provides for efficient meetings, no matter whether the participants stand or sit.

Adapted to the surrounding furniture, the terminal features modern integrated media technology which can be configured according to individual demands and budget requires.

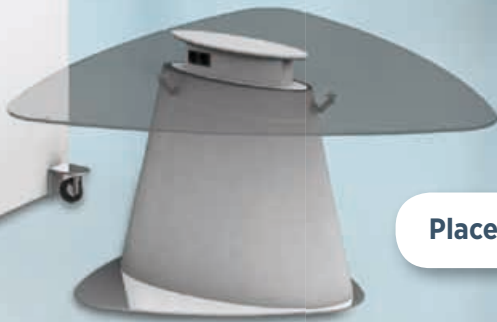

- Integrated height adjustment.

- Various designs and furniture surfaces to fit to your room style.

Place2move

Place2conference

For versatile use

Place2move - The mobile presentation solution for lobbies and lounges, for open-space offices and exhibition halls, for conferences and private talks and whenever and wherever needed.

Place2conference - For a greater number of participants.

For a flexible and mobile use at a larger conference table. A greater number of participants has the chance to plug in at the mobile monitor unit via the integrated "CablePort team".

"As designer of meeting rooms we understand our task to encourage and support communication in perfectly planned and equipped offices".

Integrated CablePort team

The participants connect their notebooks directly with the display via the integrated desktop connection "CablePort team". In no time are they ready to communicate with one another effectively.

CablePort team

Four VGA/Audio connection cables are hidden behind the flap, with mains and network connections integrated in one port.

The special VGA/Audio or HDMI cable features a "show me" button and status LEDs.

Place2promote

Fields of application:

- Car dealers
- Travel agencies
- Coffee and tea shops
- Wineries
- Book shops
- Estate agents

Place2promote – the platform for:

- PowerPoint and internet presentations
- Product videos
- Operating and service manuals

In the exhibition room or sales room the terminal catches the customer's eye with its extraordinary design.

Place2promote allows sales persons to work more innovatively and productively and enhance their competitiveness.

Place2promote – A promotion tool in exhibition and sales rooms

Open spaces with a communication terminal in the centre are the first step to successful sales talks!

Independent of your range of products, the elegant design of **Place2promote** creates a pleasant ambience for a professional presentation.

Place2promote is infotainment at the point-of-sale and can be updated in a few seconds.

This makes it ideal for spontaneous promotion activities, e. g. for culinary samples, a virtual test drive or a run-on text in the travel agency.
