New Work When the open-plan office becomes a creative hotspot and desk sharing is part of everyday work, the digital and technical conditions must be suitable. Is your cable management ready for this new age?

Conferencing Take a seat, plug in your notebook and the meeting or video conference is ready to start. It‘s that simple when CablePorts with the relevant connections are in place.

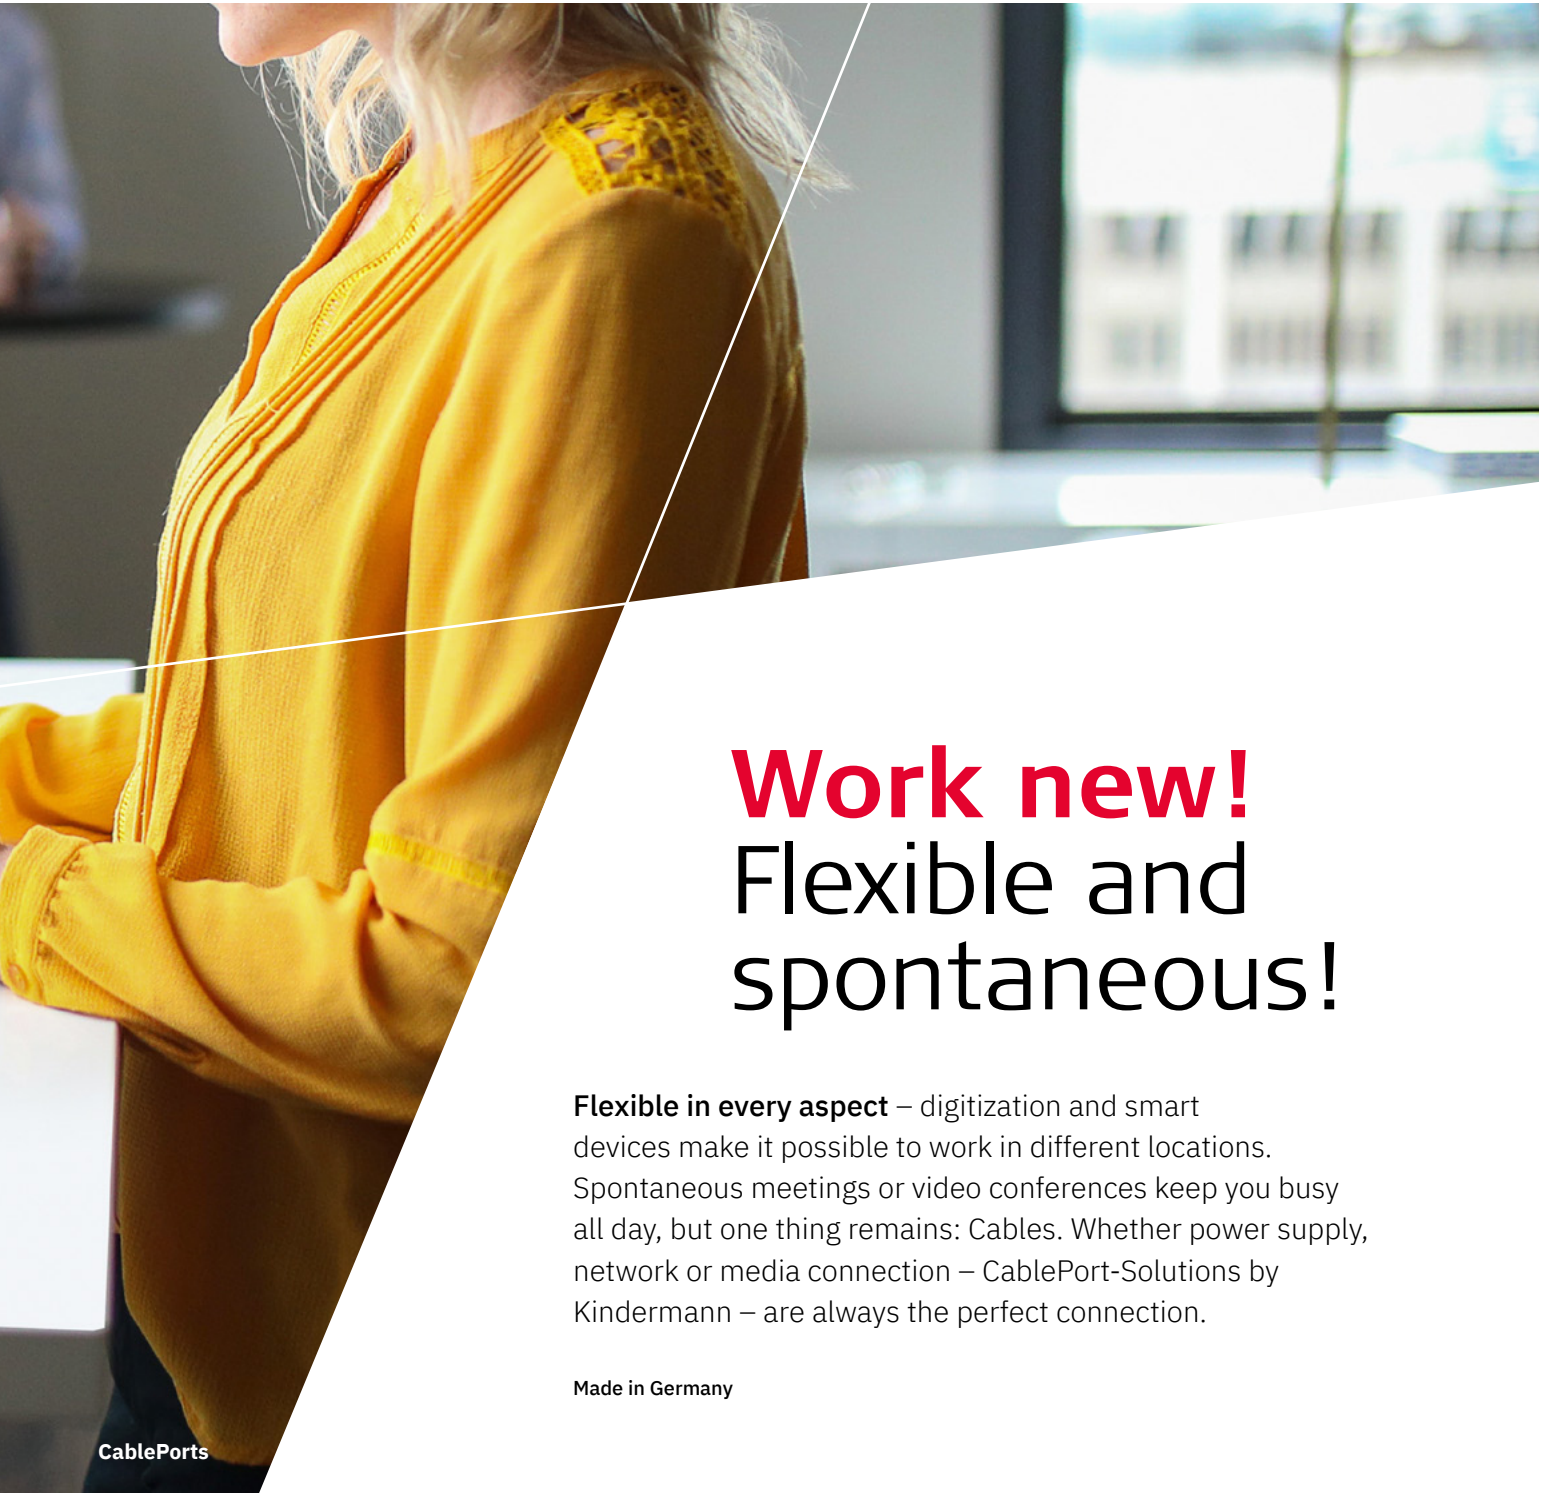
Education is supposed to become digital, but many have missed the “connection”. No problem, we created the right connections.

Transferzones When it takes longer and the battery of your smartphone, tablet, etc. is running low, power is needed. Elegant help is provided by perfectly integrated power connections where they are needed.

Living Our digital companions are always hungry for power.
Our stylish sockets are especially made for the living area, they can be discreetly integrated.

No wishes remain “unfilled”!
All table connection panels at a glance!

Konnect design click Stunning connection options for all common switch frames as well as our table connection panels, floor tanks and 19 inch racks.



Work new!
Flexible and spontaneous!

Flexible in every aspect – digitization and smart devices make it possible to work in different locations. Spontaneous meetings or video conferences keep you busy all day, but one thing remains: Cables. Whether power supply, network or media connection – CablePort-Solutions by Kindermann – are always the perfect connection.

Made in Germany

Get connected – Fast and easy

Desk sharing will play an increasingly important role in open-plan offices. To ensure that no time is lost connecting your notebook, all desks should be equipped in the exact same way. CablePorts from Kindermann not only ensure convenience, but also fast connection to power, network and other media devices.

For example, the **CablePort desk²**, which is ideal for retrofitting thanks to its flexible clamping and customizable equipment.

- Individual configuration with **Konnect flex 45 click** adapter plates (see page 40)
- Integration of media control-systems, USB charger possible
- High-quality material: Choose between anodized aluminum or powder-coated sheet steel
- Flexible mounting clamp for quick tool-free and non-slip mounting on tabletops

Thanks to two thumb-screws, a tool-free and easy clamping to tabletops between 10 - 60 mm thickness is possible.

The pivot
for your power

Make your **CablePort desk² 80** solution even more flexible with the “turn” swivel. Ideal for huddle spaces so everyone can comfortably reach the connections.

The CablePort desk² 80 is available in two housing variants: powder-coated, RAL 7015 slate gray and anodized aluminum.

The CablePort desk² 80 can be conveniently mounted in a standard 80 mm cable outlet. The supply cables are invisibly routed under the tabletop.

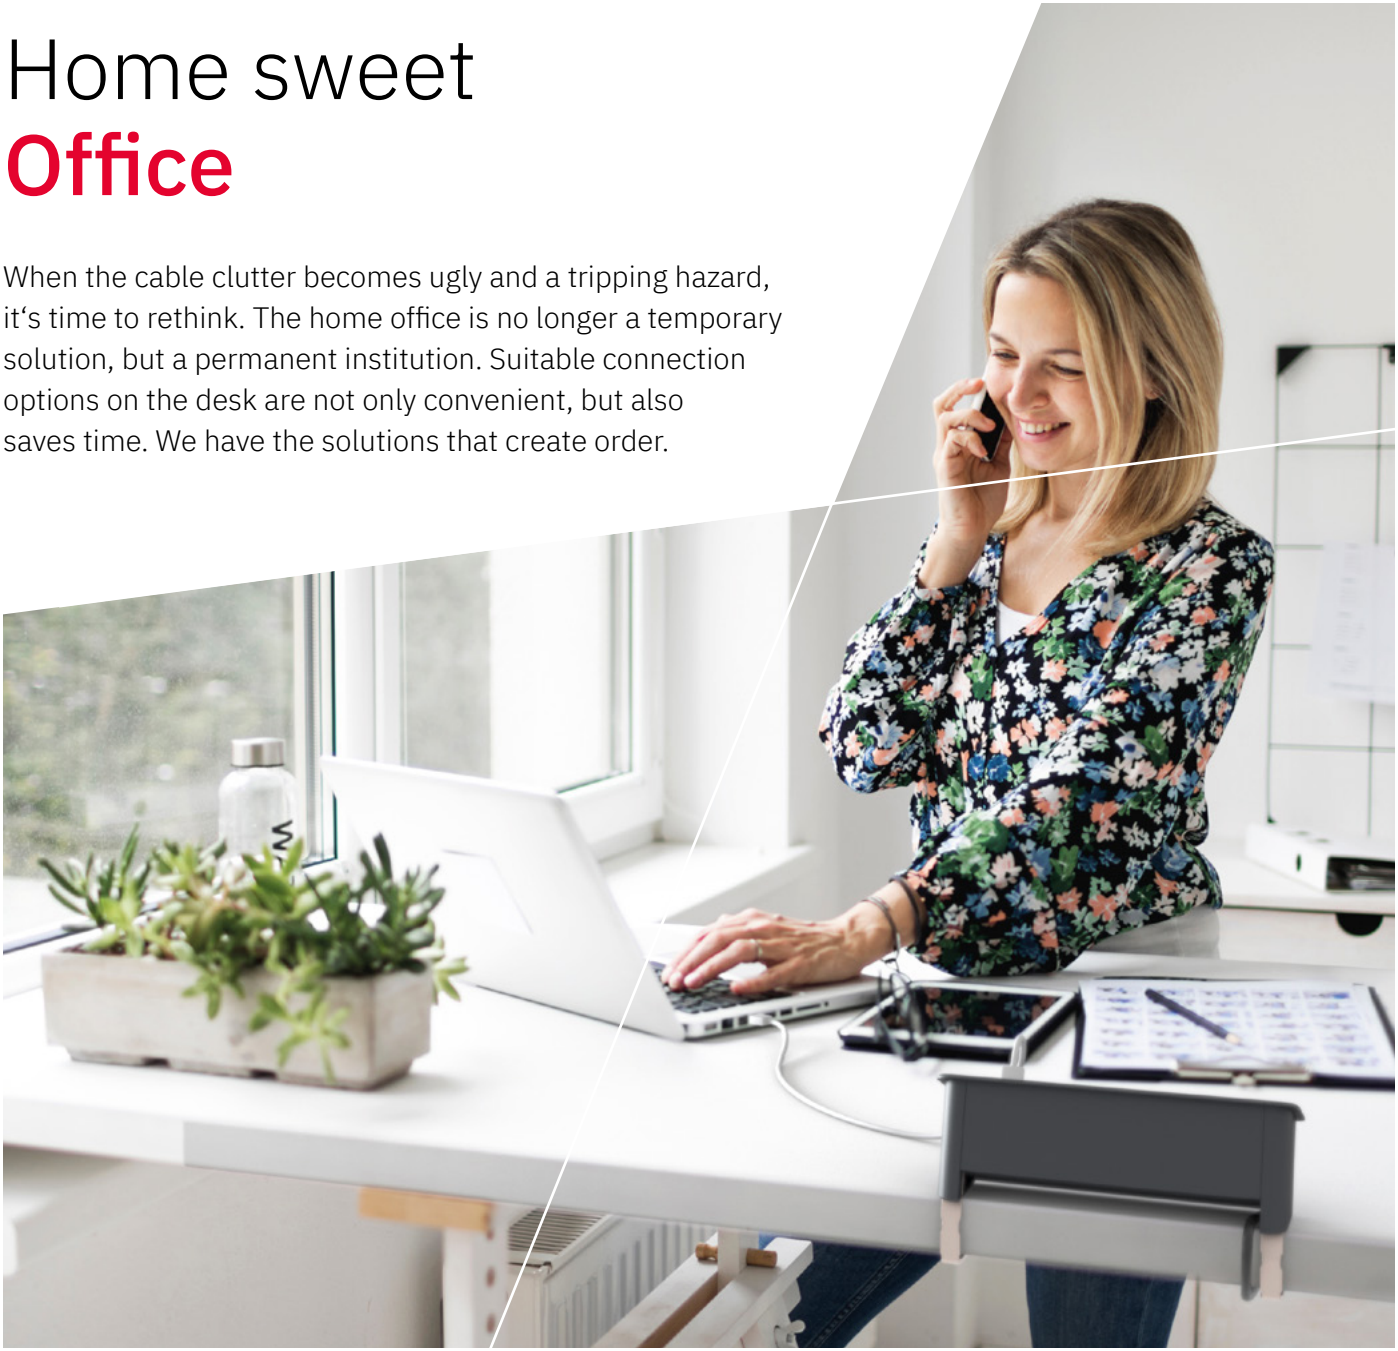
Konnect flex 45 click

Flexible connection options where they are needed. “turn” as a design and function extension, rotatable +/- 150° in 30° steps. If necessary, also fixable.

In addition, the CablePort desk² can be individually equipped with Konnect flex 45 click adapter plates (see page 40).

Home sweet **Office**

When the cable clutter becomes ugly and a tripping hazard, it‘s time to rethink. The home office is no longer a temporary solution, but a permanent institution. Suitable connection options on the desk are not only convenient, but also saves time. We have the solutions that create order.



An end to tripping hazards and ugly cable clutter

CablePort Office desk

Home offices in particular need solutions that are very easy to install. The CablePort Office desk is ideal for this. The modular tabletop solution can be configured individually according to your requirements. The design in elegant slate gray matches any ambience and is a real eye-catcher at the same time.

New Meeting Culture

Conference rooms have become into communication centers. Whether meetings with guests, spontaneous coordination in a working group or video conferencing for hybrid teams, notebooks and tablets are always present. Kindermann offers a whole range of smart solutions for power supply, network and media connection, so that your meeting can start without delays.

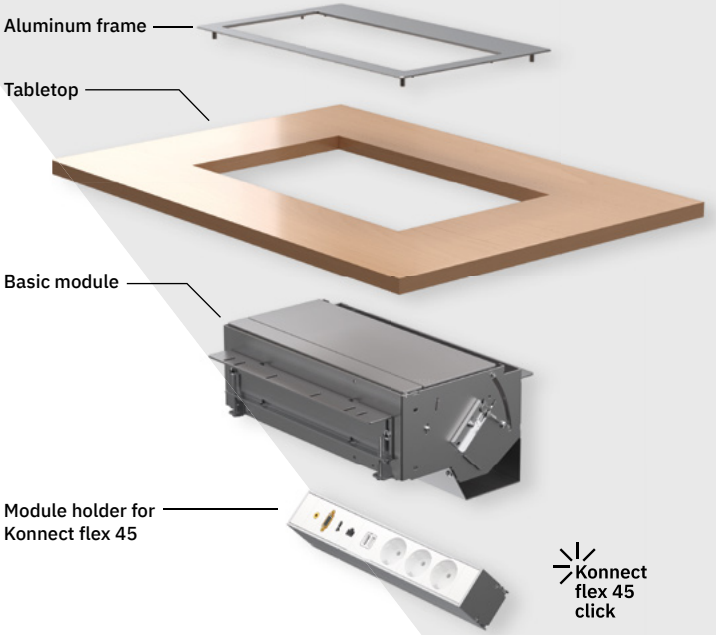
Hidden
Connection diversity

High-quality technology with an elegant design. The CablePort flex is Kindermann's modular cable management solution for Power, AV, Data and Network connections in demanding environments.

CablePort flex

The high-quality table connection panel can be installed flush with the surface of any conference table. A light tap on the cover is all it takes for it to open automatically and disappear almost invisibly into the housing.

The connections are angled for convenient plug-in, and at the same time there is enough space inside to conceal power supply units and cables.



After connecting all devices, a movable flap ensures the cable exit in the closed state.

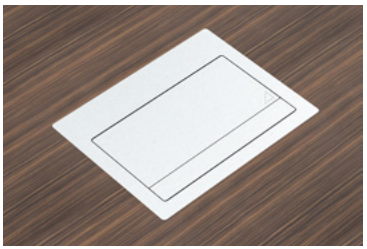
No wishes remain unfilled:

Customize the frame as well as the surface according to your ambience.

Aluminum frameless

Individual surface

Aluminum frame



Slide into the **Meeting**

The stylish table connection panel is discreetly integrated into the table for a clean look. The sliding cover elegantly hides the ports when they are not needed and protects them from dust and dirt.

The two-part cover made of anodized aluminum is very easy to slide open.

CablePort frame slide

The stylish table connection panel is discreetly integrated into the table for a clean look. The sliding cover elegantly hides the ports when they are not needed and protects them from dust and dirt.

CablePort frame slide is available for 4 or 6 module holders. The unit can be configured individually according to your requirements. Also available without cover.
See page 28.

The CablePort frame slide can be configured individually according to your requirements.

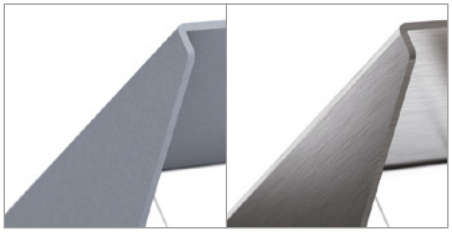
Unfold your **Potentials**

The classic reinvented. The CablePort standard² is the result of our consistent development of the well-known Kindermann classic CablePort standard.

CablePort standard²

The high-quality table connection panel can be easily top-mounted into the table cut-out. This means that the **CablePort standard²** can also be integrated into closed pieces of furniture.

- Can be individually equipped with Konnect flex click 45 adapter plates
- Fast, tool-free adapter plate mounting
- Smooth appearance due to front-mounted interfaces
- Integration of media control
- USB-Charger etc.
- Flush mounting possible
- Variants: 2-, 4-, 6-fold



Choose between two surface finishes, powder-coated in silver (RAL 9006) or brushed stainless steel

Housing for individual assembly

Closed

Konnect
flex 45
click

The module holder for Konnect flex 45 click adapter plates can be equipped individually. The flush interfaces create a clear appearance.

Leading role

The module holder is the heart of many CablePort desk connection panels but can also be used stand-alone. It is available with four or six sockets and can be pre-assembled or individually equipped. The mounting of the interface plates is quick and easy thanks to the snap-on mechanism.

With the table clamp, you can mount the CablePort flex 45 module holder flexibly and without tools on tabletops with a thickness between 10-60 mm.

With the appropriate mounting brackets, the module holder can also be mounted under the tabletop or in cable trays.

In addition, further mounts are available. This allows the module holder to be mounted between tables or on display stands.

Wonderbar
Modular

This module holder leaves nothing to be desired, whether power sockets (also international), media connections, buttons for various functions or USB charging option – everything is possible.

You never stop learning!

The digitization of schools and universities is advancing fast. PCs, Notebooks and smart devices are now part of the “everyday education”. One thing should not be forgotten in all these measures – fast and convenient connectivity.

Empower
the Future

CablePort table[3]

The high-quality connection panel with stainless steel surface is available in different variations. For example, with a socket and a charger with USB-C port for charging tablets or smartphones. Two cable outlets can be equipped individually.

Perfect for installation in cable outlets with 80 mm diameter. Simply select your configuration, insert the unit and go.

CablePort Office

The cost-effective solution for retrofitting. Get exactly the connections you need – in a compact design. The choice is yours:

CablePort Office[desk] for clipping to tabletops

CablePort Office[frame] placed in cable-channels

CablePort Office[frame] integrated into tabletops

Konnect flex 45 click

Installation scheme for a switch frame

Kindermann
a strong manufacturing

Thanks to the in-house R&D, solutions are created that stand out from the mainstream. The main focus is always on easy and fast installation and intuitive use. In addition, the emphasis is also on the design aspect.

Challenge us.

At the company‘s site in Eibelstadt near Wuerzburg, Kindermann manufactures a wide range of media technology products such as table connection panels, display/projector mounts, ceiling lifts and media furniture. The production also offers the flexibility to react to special requests and to offer small series.

Our production facility, with over 5,000 square meters, is equipped with state-of-the-art machines. This ensures the highest precision down to the last detail. Especially on the international market, „Made in Germany“ still has a high value and stands for great quality.

The areas of development, manufacturing, sales and service are ISO 9001:2015 certified.

Good, better, **Kindermann:**

Put your trust in our expertise. *Kindermann, founded in 1861, is the oldest company in the Pro AV industry and one of the leading suppliers acting as manufacturer and distributor today. It's the sophisticated details that make Kindermann branded products that "tick" better.*

Our promise of quality. *Right from the development stage, Kindermann places great emphasis on ease of installation and operation. Series products such as the table connection panels are developed and manufactured at the Eibelstadt site near Wuerzburg - quality „Made in Germany".*

Modular, future-proof, expandable and sustainable. *Our table connection panels are designed in such a way that they can be easily adapted to new requirements if necessary. This is ensured in a simple way by the innovative* ***Konnect flex click system.***

One-stop shopping. *Kindermann is a full-line supplier of Conference, Presentation and Media Technology, Digital Signage and dedicated Education solutions. This is how products become solutions that are perfectly matching.*

We would be happy to provide you with consulting services. *As a manufacturer and distributor, Kindermann sells exclusively through qualified specialist Distributors and Dealers. Trade partners can count on competent consulting and individual project support - from planning to equipment and integration.*
